Message from the Chief, Fred Charlton

Please include us in your summer plans...there are many community events coming up this summer that Clackamas Fire District #1 will be participating in and we hope to see you there. Here are a list of events and you can find more information on our website at www.clackamasfire.com:

- Day in Damascus - July 29 at Centennial Park
- National Night Out - August 3 across our community
- September is National Preparedness Month - The 2017 theme is, "Disasters Don't Plan Ahead, You Can. Don't Wait. Communicate."
- Oregon City Hilltop Health and Safety Fair - September 16
- October is Fire Prevention Month - This year’s Fire Prevention Week theme is, "Every Second Counts: Plan 2 Ways Out!"

As a reminder, we are beginning to see hot and dry weather that is quickly drying out vegetation across our community. Please use extreme caution when recreating outdoors and especially if you are using an open flame. Take time to assess your home and business to ensure any unwanted vegetation and debris is removed to help reduce the risk of spreading a fire.

District-Wide Facility Improvements

Written by Facility Maintenance Manager Scott Vallance

The Fire District received a matching grant from Oregon Department of Forestry (ODF) to install a 34,000+ gallons water storage tank at Clarkes Station 13. The water storage tank has been installed and is operational to provide water for use on wildland and residential fires.

Pictured above, from left to right: The water storage tank at Clarkes Station 13 and Beavercreek Station 10 gets a new paint job.

Both of these facilities (Beavercreek Station 10 and Clarkes Station 13) will also be getting new and repaired asphalt as well as asphalt seal at Beavercreek Station 10.
District-Wide Facility Improvements (cont.)

The South End Station 17 had some modifications done to the apron in front of the fire station. The angle from the apron/sidewalk was too steep for some of our apparatus and they would drag as they left the station. An engineer was selected to assist the Fire District with this project. The new front apron at South End Station 17 is almost complete. The new pad removed a hump from the original design that was problematic for the fire apparatus upon departure. The new pad will improve response times and reduce the possibility of damage to the fire engines.

Pictured left is the new front apron at South End Station 17.

The lighting program that the Facility Maintenance Department contracted with the Energy Trust of Oregon is complete. This program allowed for the complete conversion to LED lighting, both interior and exterior, at 11 Fire District properties. Not only does this conversion improve lighting at these facilities, it should also help to reduce energy costs. While the entire package cost was in excess of $135,000, the Fire District’s portion was approximately $5,500, or about 3.9% of the total cost.

Message from the Board of Directors

Congratulations to Director Don Trotter who was re-elected in the May 16, 2017 Special District Election and to Director Jay Cross who will fill the position of retiring Director John Blanton. They will each serve a four-year term as a board member.

During the month of June, Clackamas Fire District #1’s Board of Directors held several meetings. On June 19, a work session was held where staff presented information regarding the new integrated resource planning (ERP) software program and other data-related programs, discussion of the Annual Compliance report and a discussion regarding the contract with Emerick Construction to build the Fleet/Logistics building.

Following the work session, the regular board meeting was held. On behalf of the Fire District, Chief Charlton recognized Director Blanton for his four and a half years of service as a Director. Chief Charlton shared that Director Blanton’s leadership and guidance was greatly appreciated. Director Blanton was presented an award and a chief’s helmet. The Fire District wishes Director Blanton well in his retirement. Pictured left, is Director John Blanton in his chief’s helmet.

At the same board meeting, Chief Charlton gave the oath of office to Directors Trotter and Cross, which is pictured below.

The Fire District’s Agent of Record Jeff Griffin from Wilson-Heirgood Associates provided information regarding the annual workers’ compensation renewal.

Left to right: Chief Charlton, Director Cross, and Director Trotter
Message from the Board of Directors (cont.)

It was followed by the regular board meeting where the Board approved the following:

- Workers’ compensation renewal
- Approval of Resolution 17-04 – Adopting the Budget, Making Appropriations, and Levying Taxes for Fiscal 2017-2018
- Certification of election results for Directors’ positions
- Contract with Hennebery Eddy Architects for architectural services for Damascus Station 19
- Proposal with Wilco for fueling services
- Contract with Emerick Construction Company to build the Fleet and Logistics building

A special board meeting was held on June 27 to discuss and approve Resolution 17-05 – Adopting and Appropriating a Supplemental Budget for Fiscal 2016-2017.

Meet Clackamas Fire’s New Board Member

Director Jay Cross grew up in Southern Oregon, moving to Northern Oregon in 1991. He has been married to his wife, Leslie, for 26 years. He and his family live in Eagle Creek and attend Good Shepherd Church in Boring. In 1992, Director Cross began his career with Gresham Fire Department and is currently serving as the EMS Officer. He has been in emergency services for over 30 years.

Along with his EMS duties, Director Cross is the founder of a cooperative program coupling Gresham Fire with OHSU Nursing students. This program reaches out to people of the community in their own homes who need various medical attention. The goal of the program is to help educate citizens in obtaining proper medical care, thus reducing their need for 911 services.

Director Cross served on the last Board of Directors of Boring Fire District #59 and worked with Clackamas Fire through the legal integration and annexation to better serve the residents of East Clackamas County.

Safety/Public Education

Campfire Safety

Camping season is here, which means more and more people will be outside building recreational and cooking fires. Clackamas Fire District #1 has provided these tips to help keep you and your family safe while enjoying campfires this summer.

- Build campfires where they will not spread, away from dry grass and leaves. Place rocks in a circle around your fire area.
- Keep campfires small and don’t let them get out of hand.
- Keep plenty of water and a shovel nearby to douse the fire when you’re done. Stir it and douse it again with water.
- NEVER leave campfires unattended.
- Don’t let children or pets play near the fire.
- Don’t let children add wood or debris to the fire.
- If your clothes catch on fire – Stop, Drop, and Roll!
Health and Safety

The Scoop on Coffee Creamers

If you’re counting calories or watching your saturated and trans fat intake, a cup of black coffee is a good beverage choice. However, if you prefer coffee with cream, you have a wide range of options these days. Making coffee creamier used to mean adding a splash of milk or cream. Then half-and-half products (a mixture of milk and cream or a thickener) came along, as well as other liquid and powdered creamer products. Many of these products were designed with convenience in mind; many don’t require refrigeration and have long shelf lives. What exactly do these creamers contain and can they fit into a healthy eating plan?

Watch Out for Trans Fat

Good, old-fashioned cream is just that—the thick, fatty liquid that rises to the top when milk is left to stand. However, some coffee “creamers” don’t contain any real cream or milk, although they may include partially hydrogenated oil (PHO), which is a source of artery-clogging trans fats. Trans fats may be on their way out as an ingredient in U.S. foods, but there are still plenty of products that contain PHOs on supermarket shelves. Flavored creamers also contain added sugar, which raises the calorie count.

Is it Really Non-Dairy?

Some of the minimally processed products have cream or milk as their base, but several list only “a milk derivative” on their ingredients list. If you’re lactose intolerant, vegan, or are otherwise trying to avoid milk-based ingredients, be sure to carefully read the ingredients list on products marked as “non-dairy.” A common ingredient used in non-dairy creamers is actually a milk derivative called sodium caseinate.

Many new dairy-free creamers are based on plant foods, such as soy or coconut. They are generally lower in calories and fat than their dairy-based cousins, but when flavors like hazelnut, vanilla, mocha, and caramel enter the picture, it’s time to start checking calories again.

With so many choices, there are several things to keep in mind when choosing a coffee creamer.

Keep it Real

Choose a creamer made with real ingredients, such as milk, soy, or coconut, instead of one that is a mixture of sugar refined fats (especially partially hydrogenated oils), and artificial colors, flavors, and thickeners. Don’t be fooled by healthy promises on the front of the package: Read the label on the back to check calories, fat grams, and sodium, as well as the ingredients list. As with most packaged foods, the fewer ingredients and the fewer additives, the better.

Watch Serving Sizes

The majority of creamers suggest a serving of 1 tablespoon, which doesn’t seem like much. However, if you double that amount, you may be getting up to 90 calories and 4 grams of saturated fat—and that’s just in one cup of coffee. If you drink two or three cups a day, you’re potentially looking at the calorie and saturated fat equivalent of a fast-food cheeseburger. If you’re a fan of fancy coffee drinks, be aware that one 16-ounce flavored coffee with whipped cream can pack a calorie punch of up to 500 calories and more than half the saturated fat that’s recommended for an entire day.

Go Old School

Consider going back to the basics. Use low-fat milk (dairy or plant-based) or a small splash of half and half. If you like flavoring, add pure extract, such as vanilla, or a sprinkle of cinnamon or nutmeg. Limit your sweetener to a teaspoon or less of sugar or honey. If you’re accustomed to adding lots of sugar and cream or milk to your coffee, try to cut back gradually to trim some calories and saturated fat from your diet.

**You may have noticed advertisements for the newest coffee creamer creation—International Delights One Touch Latte. Be wary, however. One latte serving is 120 calories, with 6 grams of fat (all saturated) and 17 grams of added sugar (that is over 4 teaspoons!).

Employee Highlights

Payroll Administrator Shanti Burns

I began my position as the Payroll Administrator for Clackamas Fire District #1 just over two months ago. Many of my relatives are firefighters, including my father, and I loved spending time at the stations, especially when I was able to spend Christmas mornings there. I feel honored to be able to spend my time helping the Fire District and the fact that I live just five minutes away from Station 5 where the Finance Division is housed, is a very nice perk.

I am married to my husband, Oli, and we have a 10-year-old son and a three-year-old daughter. We also have a Doberman named, Nova, who absolutely loves kids, a fat orange cat named, Tawny, and a tree frog named, Zelda. I consider myself to be a very fun mom and I am constantly taking my children out to do activities. My son’s friend recently told me that every time he visits us it is an “adventure.”

I work closely with the Multnomah County Animal Shelter and foster animals that are in need of a loving home before adoption. I volunteer once a month at an amazing cat sanctuary in Sherwood that takes in cats too old for adoption and would have otherwise been euthanized. I also volunteer for the Arthritis Foundation and I am a counselor each year at a children's arthritis camp. I was diagnosed myself with rheumatoid arthritis when I was just two-years-old, affecting my hands, knees, and spine. When my arthritis is in remission; however, I stay very active. I enjoy going hiking almost every weekend, kayaking, and going on bike rides with my family. A couple of years back, I pushed my physical limits and hiked the Grand Canyon rim-to-rim and back again, totaling 45 miles in two days with the Project Athena Foundation, a group of women with physical limitations that make goals to stay active and strong.

I look forward to having a fulfilling career with Clackamas Fire and meeting all the wonderful people who make up this organization.

Senior Accountant Anh Le

I began working for Clackamas Fire District #1 on June 13, 2017 as the Senior Accountant in the Finance Division. I have a commitment to community stewardship and working in the public sector enables me to fulfill this commitment. I take pride in being a part of the community and I want to provide excellent public services to others. I deeply respect and appreciate the work that Clackamas Fire does, and it is meaningful that I am a team member of the fire family.

I graduated from Portland State University in 2012 with a Bachelor of Arts in accounting and earned a master’s in business administration from Marylhurst University in June 2017. I've been fortunate to be able to utilize what I've learned through my education in this new position.

I was born and raised in Phan Thiet, a city in southeast Vietnam. I moved to the United States with my mom and younger sister when I was 19-years-old. My mom is my hero! She inspires me to be the best possible version of myself and is someone I can look up to. My sister is a junior at Portland State University. They both live with me and I'd have to say that we're very close. My other siblings and all my nieces and nephews live in Vietnam. My family is the greatest thing I have ever had. They all are loving and supporting in nature.

I volunteer teaching Vietnamese to kindergartners at my church. Now that I've finished school, I'm thinking about starting narrative writing or a recording journal. In my spare time, I enjoy reading, traveling, hiking, swimming, and gardening. During the spring and summer, I plant flowers and grow most of my family’s herbs and vegetables.

I taught myself swimming when I was little. I conquered my fears of water and sea waves by jumping into the ocean. I loved to swim in the ocean early in the morning because I could feel the cool ocean water, watched the fish, and enjoyed the beautiful views of the sunrise.
Community Outreach

Chief Charlton Teaches to First Graders

On June 2, 2017, Chief Charlton was joined by the crew on Engine 4: Lieutenant David Palmer, Apparatus Operator Brent Coffey, and Firefighter Randy Powers to instruct a Junior Achievement class to 20 first graders from Mrs. Wright's classroom at Ardenwald Elementary in Milwaukie. The Chief handed out firefighter hats and sticker badges, followed by a tour of the engine.

Chief Charlton has been volunteering for three years for Junior Achievement in local North Clackamas School District classrooms. The course requires about one hour per week for five weeks in the classroom. The courses are grade appropriate and cover topics like what makes up a family, how communities are formed, different jobs within a community, and how money travels through the businesses. Chief Charlton tries to end each course with a brief fire and life safety presentation to make sure students stay safe.

Pictured above: Crew from Engine 4 and Chief Charlton with Mrs. Wright's first grade class.

Chief Charlton Inducted as 2017 Board Chair for the Chamber of Commerce

On Thursday, June 15, 2017, Clackamas Fire Chief Fred Charlton was inducted as the 2017 Chair of the Board of Directors for the North Clackamas County Chamber of Commerce. Chief Charlton will serve a one-year term working with the Chamber Board of Directors and Chief Executive Officer to meet the needs of the business community made up of over 500 members. The Board will be focusing on executing the Chamber’s Strategic Business Plan goals and objectives, expanding opportunities to provide leadership training and workforce development and focusing on creating a more vibrant business community.

Community Outreach (cont.)

**Touch-a-Truck**

Clackamas Fire District #1 has partnered with the Oregon City Police Department and the Oregon City Library for a friendly Police vs Fire Challenge for their Summer Reading Program. Sign-ups began June 1 and will go through July 28 for children to pick up their registration packet and a free book. When they complete their reading log and return it to the library, they earn $0.25 towards the butterfly garden by voting for Fire Chief Fred Charlton or Police Chief Jim Band. They get a sticker to put on a life size cut out of either Chief.

On Monday, June 19, 2017 at the Oregon City Public Library Park was the Touch-a-Truck event. Children and their families were able to get up close and personal with a fire truck, a SWAT vehicle, or an Oregon City Public Works vehicle for a meet and greet. They were able to hear from both Chiefs, firefighters, and police officers about the importance of reading throughout the summer.

**What is it?**

Written by ITS Administrator Mark Horst

For the past four years, 911 centers have been planning/preparing to implement the TriTech Software Systems “Inform CAD.” Clackamas Fire has been heavily involved in the building and configuration of the Mobile CAD that will be used on all fire apparatus in Clackamas County.

The project go-live date for the new CAD system is set for February of 2018. To achieve this, we will be testing the configuration of the new mobile application against the 911 “CAD” application to ensure all systems and commands work properly. Testing will begin the week of July 10, 2017 and proceed all the way up to the go-live date. This will be a completely new type of technology, as we prepare to set up training modules for all officers and firefighters to preview prior to the live date. The goal is to provide adequate training, so the changeover will not be a stressful endeavor, but a smooth transition.

To accommodate this new system, all Fire District owned emergency apparatus are being outfitted with new MDCs and Mobile Networks. These are known as the Panasonic CF-54 MDCs and the Cradlepoint Mobile Network. The Mobile Network is the connectivity to the MDC and 911 Center. It is also used by the transport Medics to allow them to start patient care reporting while transporting to the hospital.

Technology is constantly changing at a very rapid pace and with these new devices, Clackamas Fire will be able to continue to serve the needs of the public in emergent and non-emergent situations.

Pictured above: MDC CAD login.
On Wednesday, June 7, 2017 the Clackamas Emergency Services Foundation donated to Meg’s Moments for Life Jackets. Clackamas Fire District #1’s Chief Fred Charlton and the Clackamas Emergency Services Foundation President Don Trotter presented the first check for $3,000 for the purchase of life jackets to Meg’s Moments, a non-profit organization created in honor of Meagan O’Meara Clark, who drowned while rafting on the Clackamas River on July 5, 2013. Meagan was 26-years-old and was not wearing a life jacket at the time of the incident.

Every year at Barton Park, Meg Moment’s gives away free life jackets in the hopes of saving more lives and preventing drowning. To cool off and be safe before floating the river, Meg’s Moments gave away free life jackets on Saturday, July 1, 2017 at 10:00 am at Barton Park on the Clackamas River. Meg Moment’s for Life Jackets was joined by Clackamas Fire District #1’s Water Rescue Team from Station 8, who helped distribute life jackets and educated the public on water and boater safety tips and the importance of wearing a life jacket. Last year, over 500 life jackets were given out in only a few hours. The life jackets were purchased by donations from citizens and the Clackamas Emergency Services Foundation.

Meg’s Moments will continue to give away life jackets “in loving memory of our beautiful daughter, Megan O’Meara Clark,” says Brinda Doyle, O’Meara Clark’s mom and founder of Meg’s Moments. Meg's Moments does not “want any other family to experience the pain from the loss of a loved one when it can be prevented by simply wearing a life jacket. Life jackets save lives.”

The Clackamas Emergency Services Foundation consists of emergency service agencies within Clackamas County and provides assistance to people who’ve been affected by disaster, tragedy, injury or other adversities. To learn more about the Clackamas Emergency Services Foundation, visit the website at: http://www.clackamasfire.com/emergency-services-foundation/ or to learn more about Meg’s Moments or to make a donation, visit their GoFundMe page at: https://www.gofundme.com/a7xgw.

On Tuesday, June 13, 2017 Chief Charlton and Foundation President Trotter presented the second check for $4,000 to the Pioneer Pantry through Oregon City High School. The Pioneer Pantry provides food for the weekends and breaks to homeless and food insecure students at Oregon City High School. Students receive a “backpack” of food that contains two breakfasts, two lunches, and one bigger meal with protein, fruit, and two juices, snacks, and treats. For the 2017-2018 school year, the Pioneer Pantry projects the cost of food will be $9.00 to $10.00 with a projection of 3,300 backpacks, which will result in the need for $29,700 to support the program.

For more information or to learn ways that you can donate to the Pioneer Pantry, contact Renee Elting at: 971-563-6737 or nohungerinoc@orecity.k12.or.us.

Earthquakes have enormous power, both in its unpredictable energy and destruction. While we can't control the former, our readiness and preparedness can possibly save our home and most importantly, our lives.

The Cascadia Subduction Zone poses a very real threat to our region. It is important for all Northwest homeowners to learn what they can do to make their home earthquake resilient. The first thing to do is inspect your home or even consider hiring a professional. Your home may need structural improvements to secure it to the foundation.

**Remember SHAKE**

S=Secure all tall and heavy objects including book cases, entertainment consoles, flat screen TVs, cabinets, mirrors, etc.

H=Hire professionals to complete structure-related repairs to ensure work is done to earthquake code requirements.

A=Attach water heater with a proper brace. Learn how water can be drained and used for drinking and cooking.

K=Know where gas lines, electrical, and water shut-off valves are located. Knowledge of how to operate these vital services is critical and can prevent additional damage and harm. Keep necessary tools handy and available.

*Note: Seismic shut-off valves can be installed on main gas lines for added protection.

E=Examine hazards outside your home such as old leaning trees and large branches, electrical and power lines, and balconies that look irregular and cantilevered. Left neglected, devastating results could occur during and after a quake.
Show your team spirit by joining us for a fundraiser to support Clackamas Emergency Services. Come in to the Chipotle at 17015 SE Sunnyside Road in Happy Valley on Thursday, July 27th between 11:00am and 8:00pm. Bring in this flyer, show it on your smartphone or tell the cashier you’re supporting the cause to make sure that 50% of the proceeds will be donated to Clackamas Emergency Services.

If placing an order online during your fundraiser, please note you must choose the pay-in-store option and inform our cashier of your participation before paying. Gift card purchases during fundraisers do not count towards total donated sales, but purchases made with an existing gift card will count.
Upcoming Events (cont.)

First Responders Recognition Night

Come listen to the music for the Firefighter Band, “The District” at the Happy Valley Concerts in the Valley series at Happy Valley Park at 13770 SE Ridgecrest Rd. on Thursday, August 3 at 6:30 pm to help support First Responders Recognition Night. Special appearance from the Clackamas Fire Pipes and Drums. The concert is FREE!

Listen to hits from all ages as “The District” takes you on a musical journey. Bring your own lawn chairs, your family, and friends. Food and beverages available for purchase at the event by local vendors. See you at the park!

Board of Directors Meeting Rescheduled

The board meeting scheduled for Monday, August 21, 2017 at 6:30 pm at Mt. Scott Station 5 located at 9339 SE Causey Road in Happy Valley has been rescheduled to Monday, August 28, 2017 at 6:30 pm.

May 2017

Date: 5/5/2017 12:21:59 AM
Address: 10301 SE 252nd Dr. Damascus, OR 97089
Investigator(s): Hamilton
Type of Fire: Building Fire
Fire Area of Origin: Bathroom, checkroom, lavatory, locker room
Fire Cause: Act of nature
Estimated Dollar Loss: $90,000
Investigator Narrative: The point of origin was in the attic where the vent pipe, coming from the roof, entered the wall above the toilet. There was proof of multiple lightning strikes around the immediate area of the home, and the metal roof showed signs of being struck by lightning. The fire was classified as natural causes.
Fire Prevention (cont.)

Date: 5/19/2017 6:45:22 PM
Address: 7483 SE 76th Dr. Portland, OR 97206
Investigator(s): Liljefelt
Type of Fire: Outside dumpster or other trash receptacle fire
Fire Area of Origin: Chute/container - trash, rubbish, waste
Fire Cause: Cause undetermined after investigation
Estimated Dollar Loss: $30,000
Investigator Narrative: The business used a fast drying industrial paint that has been reported to self-heat and spontaneously combust under certain circumstances. Due to the lack of competent heat sources, the fire was possibly caused by the spontaneous combustion of rags used to clean up spilled paint and lacquer thinner, then disposed of in the outside dumpster. The fire was listed as undetermined.

Date: 5/25/2017 4:30:09 AM
Address: 10011 SE Hwy 212. Clackamas, OR 97015
Investigator(s): DeLair
Type of Fire: Outside dumpster or other trash receptacle fire
Fire Area of Origin: Undetermined
Fire Cause: Cause undetermined after investigation
Estimated Dollar Loss: $1,000
Investigator Narrative: The dumpster fire was in the area of other intentionally set fires. There was no ignition source identified.

Date: 5/31/2017 10:49:28 AM
Address: 12720 SE 169th Ave. Happy Valley, OR 97086
Investigator(s): DeLair
Type of Fire: Building Fire
Fire Area of Origin: Cooking area, kitchen
Fire Cause: Unintentional
Estimated Dollar Loss: $22,000
Investigator Narrative: This fire was suppressed by an automatic sprinkler system. A cardboard box was set on the stovetop and a burner was accidently turned on. The cardboard box caught fire. Once it reached 155 degrees at the sprinkler head, the sprinkler head activated, and suppressed a majority of the fire. This fire was classified as accidental.
